## MATH Open Ended Questions

### What did you like most about this course and instructor?

Comments
He went through examples and was able to explain them better than the professor. It felt like the time I was spending in this class was more useful than going to lecture. I could go to this class without having even looked at my notes and I'll understand more than I did in lecture. When I could think of questions to ask, he explained them very clearly and to the best of his ability. The exam where he had an extra session for going through the practice exam was one of the most helpful parts of this entire course. Not only that but when anyone emailed him with questions, he replied very quickly and did his best to help those with questions. He took much time out of his day to be a helpful AI to us students. If it weren't for him, I probably would have dropped the course.
I really liked the structure of the recitations. It was very useful to see increasingly complex examples of the ideas we learned in lecture section, and it allowed for a deeper understanding of the material.
While he wasn't on strike, he explained material well in office hours
Dimitrios is very helpful and positive during recitation. He would always ask the class what they needed help with most and we would do examples for those problems because he was good at communicating. Dimitrios was also very available to the students and helped outside of class with office hours.
Nothing ever made sense in class but it would all click in recitation thanks to Dimitrios.
Recitation was where I learned the most for this class. i feel like the recitation leader explained things more clearly than the professor, and it helped me to actually learn the information
I liked that he would work problems that we had an interest or confusion in.

### What did you like least about this course and instructor?

Comments
There were a lot of points marked off for little mistakes.
Sometimes, the examples were a bit unclear, but this wasn't often the case.
That he went on strike O.o
That we weren't informed before recitation if we would have a quiz that week or not.
I wish that there were homework keys posted.
random pop quizzes
It often ran over
